- Reading
- Public Speaking

WORK EXPERIENCES

May 2026 - TodayLahti, FI
SENIOR SOFTWARE ENGINEER AND IT SPECIALIST – Ennuste Labs Oy

Full-stack development at renewable energy focused startup Ennuste Labs Oy on ridesharing webapp for university staff and students at LUT. Developed a self-documenting modularized backend using Python’s Django library that has significantly sped up development time. Implemented an Ubuntu Linux based development server with a CI/CD pipeline using GitHub Actions to ease development. Wrote a dynamic user interface using TailwindCSS that is intuitive to use on desktop, tablet and mobile.

Jan 2026 - May 2026Lahti, Finland
FREELANCE SOFTWARE ENGINEER – Ennuste Labs Oy

Backend and frontend development on Ravintek written in Python’s Dash. Created demo version of Ravintek deployed through Google Cloud Run. Developed dynamic front page for Ravintek. Created Entrepreneurship Roadmap for renewable energy business ideas.

October 2025 - January 2026Lahti, Finland
JUNIOR RESEARCH ASSISTANT – Lappeenranta-Lahti University of Technology (LUT)

Primarily focused on the Ennuste Labs project Ravintek, a dashboard for tracking and reducing cafeteria waste at Finnish Universities using machine learning to predict food consumption. Overhauled frontend using Bootstrap, added new pages and made backend more efficient. Added crucial data pipelines through Google Cloud Run which funneled information from various APIs to a Google Bigquery Database.

Sep 2023 - Jun 2024Budapest, Hungary
LINUX SYSTEM ADMINISTRATOR – Great Grace International School (GGIS)

Supported my High School’s digitalization effort by implementing the Automatic Ripping Machine project thereby making it simple for volunteers to rip the school’s DVD library to a Synology NAS running a Plex server, which was also set up by me. Installed and set up the software on Ubuntu Server inside ProxMox. The project involved months of troubleshooting using the Linux terminal.

EDUCATION

BSC IN SOFTWARE AND SYSTEMS ENGINEERING (ONGOING)
Lappeenranta-Lahti University of Technology (LUT), Lahti

Focused on writing quality software, as well as becoming familiar with every aspect of computer science, such as web development, cybersecurity, and user interface design.
2024 - Present

HIGH SCHOOL DIPLOMA WITH SOFTWARE ENGINEERING SPECIALIZATION
Greater Grace International School (GGIS), Budapest

Specialized in Software Engineering and Computer Science (AP Computer Science A, AP Computer Science Principles)
2020 - 2024
